fi-6770

Speedy and flatbed equipped

The 90ppm / 180ipm capable (Letter, Landscape, 200 dpi) flatbed equipped fi-6770A and fi-6770 are the fastest scanners in their class. Image processing is made easy, with the ability to continuously scan 200 sheet documents containing paper of different weights, quality and sizes. The fi-6770 and fi-6770A can even scan paper up to 3 m long enabling digitization of electrocardiograms, instrumental data readings and other long documents.

Kofax Hardware VRS Board

The fi-6770A comes loaded with a Kofax Hardware VRS board that optimizes image quality on the most difficult of documents. By performing advanced image enhancements in the scanner rather than in the computer, a higher scanning speed is obtained – up to 180 images per minute at 200 dpi.

"Intelligent" functions/design for efficient operation

The ability to adapt to different paper types is the key to a true batch document scanner. The fi-6770 and fi-6770A come loaded with features allowing the scanners to work autonomously.

• Intelligent multi-feed function

The intelligent multi-feed function simplifies pre-scanning preparation and improves efficiency by identifying documents that tend to trigger false multi-feed alerts, such as documents with photos or sticky notes attached.

• Straight paper path

The straight paper path virtually eliminates paper jams while permitting a greater diversity of paper types.

• Dust resistant sealed optical units

The sealed optical units in the fi-6770 and fi-6770A ensure that image quality is maintained, even in the most demanding environments such as factories and warehouses.

ScandAll PRO image capture software

The bundled ScandAll PRO image capture software supports advanced functions such as:

• Automatic job separation

The bar code based automatic job separation function of the fi-6770 and fi-6770A allows the scanner operator to have scanned documents automatically named or routed to their appropriate folders.

• Microsoft® Office SharePoint® Server linkability

ScandAll PRO enables these scanners to seamlessly link with Microsoft® Office SharePoint® Server.

Ergonomic Automatic Document Feeder (ADF)

• ADF positioning

ADF can be moved from Center position to Left position as required.

• ADF direction

The ADF can be rotated to feed documents to the right, left or front of the scanner providing easy access for right handed and left handed users.

Kofax VRS (VirtualReScan) Professional

The fi-6670 comes bundled with Kofax Software VRS Professional Workgroup, the fi-6670A comes bundled with Kofax Hardware VRS Professional Production.
